

Review Notes

- Frontend lint and production build passed during this audit.
- Backend JavaScript syntax checks passed.
- Backend test suite requires TEST_DB_NAME=biis_test and could not run in this local environment.
- Fixed duplicate script keys in server/package.json during this audit.

File Summaries

.gitignore: Project file used by the BIIS application.

.postman/resources.yaml: YAML configuration or exported API tooling configuration.

client/.env.example: Project file used by the BIIS application.

client/.gitignore: Project file used by the BIIS application.

client/eslint.config.js: ESLint configuration for frontend static analysis.

client/fix.cjs: Project file used by the BIIS application.

client/index.html: HTML shell loaded by the Vite React client.

client/package-lock.json: Locks exact npm dependency versions for reproducible installs.

client/package.json: Defines package metadata, dependencies, and npm scripts for this workspace.

client/public/favicon.svg: Static frontend asset used by the Vite/React client.

client/public/icons.svg: Static frontend asset used by the Vite/React client.

client/README.md: Markdown documentation for project usage, requirements, tests, or demos.

client/services/api.js: Business logic layer for Api.

client/src/App.css: Main application stylesheet for login, dashboard, admin, student, teacher, and modal UI.

client/src/App.jsx: Top-level React route definitions.

client/src/assets/buet-logo.png: Static frontend asset used by the Vite/React client.

client/src/assets/hero.png: Static frontend asset used by the Vite/React client.

client/src/assets/react.svg: Static frontend asset used by the Vite/React client.

client/src/assets/vite.svg: Static frontend asset used by the Vite/React client.

client/src/components/admin/AdminAdviserManagement.jsx: React admin UI component for Admin AdviserManagement.

client/src/components/admin/AdminCourseOfferingManagement.jsx: React admin UI component for Admin CourseOfferingManagement.

client/src/components/admin/AdminDepartmentManagement.jsx: React admin UI component for Admin DepartmentManagement.

client/src/components/admin/AdminStudentManagement.jsx: React admin UI component for Admin StudentManagement.

client/src/components/admin/AdminStudentServices.jsx: React admin UI component for Admin StudentServices.

client/src/components/admin/AdminTeacherManagement.jsx: React admin UI component for Admin TeacherManagement.

client/src/components/admin/AdminUserManagement.jsx: React admin UI component for Admin UserManagement.

client/src/components/BiisLayout.jsx: Shared React UI component for BiisLayout.

client/src/components/DashboardLayout.jsx: Shared React UI component for DashboardLayout.

client/src/components/ProtectedRoute.jsx: Shared React UI component for ProtectedRoute.

client/src/components/RoleAcademicDashboard.jsx: Shared React UI component for RoleAcademicDashboard.

client/src/components/student/ScholarshipApplication.jsx: React student UI component for ScholarshipApplication.

client/src/components/student/StudentApplication.jsx: React student UI component for StudentApplication.

client/src/components/student/StudentDues.jsx: React student UI component for StudentDues.

client/src/components/StudentDashboard.jsx: Shared React UI component for StudentDashboard.

client/src/components/TeacherAdvising.jsx: Shared React UI component for TeacherAdvising.

client/src/components/TeacherDashboard.jsx: Shared React UI component for TeacherDashboard.

client/src/context/AuthContext.jsx: React auth provider that stores current user/access token and exposes login/logout helpers.

client/src/index.css: Global browser/body CSS baseline.

client/src/main.jsx: React entry point that mounts the app.

client/src/pages/CourseSelection.jsx: React page component for CourseSelection.

client/src/pages/DashboardPage.jsx: React page component for Dashboard.

client/src/pages/ForgotPasswordPage.jsx: React page component for ForgotPassword.

client/src/pages/LoginPage.jsx: React page component for Login.

client/src/pages/RegisteredCourses.jsx: React page component for RegisteredCourses.

client/src/pages/RegisterPage.jsx: React page component for Register.

client/src/pages/ResetPasswordPage.jsx: React page component for ResetPassword.

client/src/pages/UnauthorizedPage.jsx: React page component for Unauthorized.

client/src/services/api.js: Frontend API client with auth refresh handling and role-specific endpoint wrappers.

client/src/utils/date.js: Shared utility helpers for Date.

client/vite.config.js: Vite build and development-server configuration.

DEMO_GUIDE.md: Markdown documentation for project usage, requirements, tests, or demos.

package-lock.json: Locks exact npm dependency versions for reproducible installs.

postman/globals/workspace.globals.yaml: YAML configuration or exported API tooling configuration.

REQUIREMENTS_MATRIX.md: Markdown documentation for project usage, requirements, tests, or demos.

server/.env: Project file used by the BIIS application.

server/.env.example: Project file used by the BIIS application.

server/db/database.js: Initializes or resets database schema helpers used by tests and migration tooling.

server/db/init.js: Runs the full schema.sql manually against the configured database.

server/db/migrate.js: Runs pending SQL migrations, initializes fresh schemas, and records applied migrations.

server/db/migrations/20260925_course_prerequisites_and_completions.sql: Database migration that changes or repairs schema/data for existing PostgreSQL databases.

server/db/migrations/20260925_student_applications_dues.sql: Database migration that changes or repairs schema/data for existing PostgreSQL databases.

server/db/migrations/20260925_student_dues_legacy_schema_fix.sql: Database migration that changes or repairs schema/data for existing PostgreSQL databases.

server/db/migrations/20260925_student_dues_repair.sql: Database migration that changes or repairs schema/data for existing PostgreSQL databases.

server/db/schema.sql: Canonical full PostgreSQL schema for a fresh BIIS database.

server/package-lock.json: Locks exact npm dependency versions for reproducible installs.

server/package.json: Defines package metadata, dependencies, and npm scripts for this workspace.

server/scripts/create-admin.js: Command-line script for Create Admin maintenance, seeding, importing, repair, or demos.

server/scripts/demo-api.js: Command-line script for Demo Api maintenance, seeding, importing, repair, or demos.

server/scripts/import-buet-teachers.js: Command-line script for Import Buet Teachers maintenance, seeding, importing, repair, or demos.

server/scripts/migrate-course-approval-multi-teacher.js: Command-line script for Migrate Course Approval Multi Teacher maintenance, seeding, importing, repair, or demos.

server/scripts/migrate-student-services.js: Command-line script for Migrate Student Services maintenance, seeding, importing, repair, or demos.

server/scripts/repair-student-dues-legacy-schema.js: Command-line script for Repair Student Dues Legacy Schema maintenance, seeding, importing, repair, or demos.

server/scripts/repair-student-dues.js: Command-line script for Repair Student Dues maintenance, seeding, importing, repair, or demos.

server/scripts/reset-admin.js: Command-line script for Reset Admin maintenance, seeding, importing, repair, or demos.

server/scripts/seed-buet-departments.js: Command-line script for Seed Buet Departments maintenance, seeding, importing, repair, or demos.

server/scripts/seed-current-data.js: Command-line script for Seed Current Data maintenance, seeding, importing, repair, or demos.

server/scripts/seed-demo.js: Command-line script for Seed Demo maintenance, seeding, importing, repair, or demos.

server/scripts/seed-full-demo.js: Command-line script for Seed Full Demo maintenance, seeding, importing, repair, or demos.

server/src/app.js: Creates the Express app, configures CORS, JSON parsing, cookies, routes, 404 handling, and the global error handler.

server/src/config/auth.config.js: Centralizes JWT, refresh-token lifetime, bcrypt, and secure refresh-cookie settings.

server/src/config/db.js: Configures the PostgreSQL connection pool and chooses the normal or test database safely.

server/src/config/mail.config.js: Reads SMTP and password-reset email settings from environment variables.

server/src/controllers/admin-academic.controller.js: HTTP controller layer for Admin Academic; maps requests to services and responses.

server/src/controllers/admin-student-services.controller.js: HTTP controller layer for Admin Student Services; maps requests to services and responses.

server/src/controllers/admin.controller.js: HTTP controller layer for Admin; maps requests to services and responses.

server/src/controllers/auth.controller.js: HTTP controller layer for Auth; maps requests to services and responses.

server/src/controllers/password-reset.controller.js: HTTP controller layer for Password Reset; maps requests to services and responses.

server/src/controllers/student.controller.js: HTTP controller layer for Student; maps requests to services and responses.

server/src/controllers/teacher.controller.js: HTTP controller layer for Teacher; maps requests to services and responses.

server/src/middleware/auth.middleware.js: Express middleware for Auth.

server/src/middleware/authorize.middleware.js: Express middleware for Authorize.

server/src/repositories/academic.repository.js: Database access layer for Academic.

server/src/repositories/admin-bootstrap.repository.js: Database access layer for Admin Bootstrap.

server/src/repositories/admin-student-services.repository.js: Database access layer for Admin Student Services.

server/src/repositories/admin.repository.js: Database access layer for Admin.

server/src/repositories/password-reset.repository.js: Database access layer for Password Reset.

server/src/repositories/session.repository.js: Database access layer for Session.

server/src/repositories/student.repository.js: Database access layer for Student.

server/src/repositories/teacher.repository.js: Database access layer for Teacher.

server/src/repositories/user.repository.js: Database access layer for User.

server/src/routes/admin-academic.routes.js: Express route definitions for Admin Academic endpoints.

server/src/routes/admin-student-services.routes.js: Express route definitions for Admin Student Services endpoints.

server/src/routes/admin.routes.js: Express route definitions for Admin endpoints.

server/src/routes/auth.routes.js: Express route definitions for Auth endpoints.

server/src/routes/student.routes.js: Express route definitions for Student endpoints.

server/src/routes/teacher.routes.js: Express route definitions for Teacher endpoints.

server/src/server.js: Starts the backend server after checking database connectivity.

server/src/services/admin-academic.service.js: Business logic layer for Admin Academic.

server/src/services/admin-bootstrap.service.js: Business logic layer for Admin Bootstrap.

server/src/services/admin-student-services.service.js: Business logic layer for Admin Student Services.

server/src/services/admin.service.js: Business logic layer for Admin.

server/src/services/auth.service.js: Business logic layer for Auth.

server/src/services/mail.service.js: Business logic layer for Mail.

server/src/services/password-reset.service.js: Business logic layer for Password Reset.

server/src/services/student.service.js: Business logic layer for Student.

server/src/services/teacher.service.js: Business logic layer for Teacher.

server/src/utls/ownership.utls.js: Shared utility helpers for Ownership.

server/src/utls/password.utls.js: Shared utility helpers for Password.

server/src/utls/token.utls.js: Shared utility helpers for Token.

server/src/validators/academic.validator.js: Request validation rules for Academic.

server/src/validators/admin.validator.js: Request validation rules for Admin.

server/src/validators/auth.validator.js: Request validation rules for Auth.

server/src/validators/password-reset.validator.js: Request validation rules for Password Reset.

server/src/validators/student.validator.js: Request validation rules for Student.

server/src/validators/teacher.validator.js: Request validation rules for Teacher.

server/test/academic/academic-management.test.js: Automated test or test helper for Academic Management.

server/test/admin/admin-bootstrap.test.js: Automated test or test helper for Admin Bootstrap.

server/test/admin/admin-management.test.js: Automated test or test helper for Admin Management.

server/test/admin/admin-user-creation.test.js: Automated test or test helper for Admin User Creation.

server/test/admin/department-management.test.js: Automated test or test helper for Department Management.

server/test/auth/auth.test.js: Automated test or test helper for Auth.

server/test/auth/password-change.test.js: Automated test or test helper for Password Change.

server/test/auth/password-reset.test.js: Automated test or test helper for Password Reset.

server/test/database/database-safety.test.js: Automated test or test helper for Database Safety.

server/test/helpers/check-test-database.js: Automated test or test helper for Check Test Database.

server/test/helpers/test-database.js: Automated test or test helper for Test Database.

server/test/README.md: Markdown documentation for project usage, requirements, tests, or demos.
